# Why brewmac ?

## Spacious compartment

Brewmac provides spacious compartment for easy bottle installation.

## No wastage and spillage.

Brewmac saves your money by eliminating any spillage, over-pouring and liquor theft through our state of the art nozzle design which can pour liquid into any container with an impressive precision of less than 2ml.

## Empty bottle notification.

Brewmac's technology helps you to detect the level of liquid in each valve and send you notifications based on your requirement on your chosen device.

## Over 100 recipes available over cloud.

Brewmac comes with a cloud support providing over 100 pre-programmed recipes and ability to add new and custom recipes.

### Fast and parallel dispensing.

Brewmac allows upto 4 liquids to be poured simultaneously with a flowrate of 20ml per/sec (approx.)

### Perfect and consistent drink.

Pour every drink with the exceptional precision of less than 2 ml, enjoy your drinks with just a push of a button.

### No cross-contamination.

Brewmac exceptional nozzle engineering ensures every drink poured is quality checked by pouring each liquid separately, eliminating any chance of cross contamination.

### New and custom recipes can be easily added.

Brewmac allows you to add new and custom recipes with the help of our easy to use interface.
